

Sticky notes templates to learn French vocabulary

Nouns

Color code to remember the gender

Pro tip: If the ending of a noun gives away the gender, underline it. It will make it learning future words easier.

Refer to [the gender hacker](#) to know which endings correspond to masculine or feminine words.

Corresponding gendered article

Translation or drawing to remember the meaning

Special cases:

Noun with a masculine and a feminine version

Irregular plural form

Adjectives

Verbs

You can use a color code for the most common conjugation types.

Pro tip: Most French verbs follow a conjugation pattern. Find a verb that you already know with the same conjugation pattern and write it under your new verb. You will save 90% of the effort needed to learn the new verb, since you'll know the conjugation already.

Special cases: irregular verbs

Irregular verbs are verbs who have their own conjugation pattern. You can also use the technique below when you learn the first verb of any conjugation type.

Note: you may want to use more sticky notes for other tenses if they are relevant to you.

Phrases

The diagram consists of six yellow sticky notes arranged in a 3x2 grid. Each note contains a French phrase and its English translation. Arrows from external text labels point to specific elements on the notes.
